ABOUT ME

Hey there! I'm Tushar, though the internet mostly knows me as **Eyrae**. I'm a full-stack developer and digital artist who absolutely loves bringing creative chaos to life! Whether I'm building a sleek, dynamic web application, engineering custom mods for Minecraft, or pushing pixels to create immersive artwork, I thrive right at the intersection of logic and aesthetics. I am constantly exploring new frameworks and creative mediums to build tools that are as fun to use as they are beautiful to look at. When I'm not deep into code or a canvas, you can usually find me smashing shuttlecocks on the badminton court!
